Prerequisites

Prerequisites

- You should have prior experience with

Prerequisites

- You should have prior experience with
 - Hibernate development

Prerequisites

- You should have prior experience with
 - Hibernate development
 - Basic CRUD

Prerequisites

- You should have prior experience with
 - Hibernate development
 - Basic CRUD
 - Mappings: One-to-One, One-to-Many and Many-to-Many

Prerequisites

- You should have prior experience with
 - Hibernate development
 - Basic CRUD
 - Mappings: One-to-One, One-to-Many and Many-to-Many
- Maven (pom.xml)

Development Environment

Development Environment

- You should have these dev tools installed:

Development Environment

- You should have these dev tools installed:
 - Eclipse or IntelliJ ... or your favorite IDE :-)

Development Environment

- You should have these dev tools installed:
 - Eclipse or IntelliJ ... or your favorite IDE :-)

We will use Eclipse in the videos
But everything will work with IntelliJ
or another IDE

All you need is basic Maven support

Development Environment

- You should have these dev tools installed:
 - Eclipse or IntelliJ ... or your favorite IDE :-)
 - MySQL Database Server

Development Environment

- You should have these dev tools installed:
 - Eclipse or IntelliJ ... or your favorite IDE :-)
 - MySQL Database Server
 - MySQL Workbench
